

## 3000-lb Seismic Battery Rack

Date: May 23<sup>th</sup>, 2018

Model #: 091200X-XXX, 5610292-001

Dear Valued Customer,

Alpha's 3000-lb seismic battery rack systems have been providing a solution for small mono-block battery storage for the last several years. Due to declining demand of this system, Alpha will no longer be manufacturing new units. We have replaced this design with an open rack battery bay, part numbers 0541113-001 and 0540113-002 (125A, 250A 5 Tray - 48Vdc).

As a valued customer, Alpha is offering you a last-time buy opportunity until September 1<sup>st</sup>, 2018 with a ship date no later than December 31<sup>st</sup>, 2018.

Even though production for battery bays is being ramped down, Alpha has a detailed inventory plan to support repairs beyond the end of life (EOL) date.

We are happy to work with you to determine the quantities you need to order in this last-time buy. We highly recommend that orders be placed as far as possible in advance of the deadline. We apologize for the short notice and will attempt to accommodate all requirements. Note that all orders require non-cancellable, non-returnable purchase orders.

No response to this notification is required. Should you have any questions or comments regarding discontinuation(s), please address these to your Alpha sales representative or contact us directly at 1-800-667-8743.

Sincerely,

JD Fraser
