ALPHA XM2-300HP: RIGHT POWER, RIGHT FOOTPRINT, RIGHT PRICE FOR FIBER DEEP NETWORKS

VANCOUVER, BC. June 21, 2010 – With the recent introduction of the XM2-300HP, 300 watt CableUPS®, Alpha Technologies is enhancing its position as the world leader in Broadband power systems. Incorporating informative and diagnostic firmware-based Alpha Apps in an economical and compact package, Alpha is providing a cutting edge solution to reduce operating expenses and optimize system provisioning and maintenance.

“The new XM2-300HP CableUPS provides operators with an economical system solution to increase their network reliability when performing node segmentations and fiber deep deployments. As a new feature, our Alpha Apps for battery and power supply maintenance predictability are the first step towards revolutionizing our platform,” said Jim Heidenreich, VP of Product Management for Alpha Technologies Inc. “All of this innovation is packed into a CableUPS and LPE Enclosure system that is half the price and one-third the size of a typical XM2/PWE3 system.”

The XM2-300HP has the highest available efficiency, and the most advanced intelligence monitoring in the market. This allows MSOs to reduce their energy expenses and minimize unnecessary maintenance and site visits.

“The XM2-300HP operates up to 94 percent efficient and has integrated DOCSIS® DPM status monitoring in a single battery configuration to reduce OpEx going forward. As network topologies change, Alpha is continuing to innovate next generation powering solutions for both outside plant and MDU requirements. We see a great fit for the XM2-300HP to replace Non-Standby 60V power supplies to increase reliability for MDU customers,” said Heidenreich.

The XM2-300HP power system is now shipping to Alpha’s worldwide customer base, with two mounting options:

- 1) CableUPS in an Outdoor Enclosure (LPE)
- 2) CableUPS in MDU Indoor Shelf (WMS)

Alpha Technologies Ltd. is an established leader in the design, manufacture, service and installation of powering solutions for the Telecom, CATV, Traffic, Security, Medical, Industrial, and Renewable Energy industries. The company offers a broad portfolio of high-quality, feature-rich solutions that can be customized to suit almost any application and environment offering the highest performance and best value in the industry. With a focus on being your power solutions partner, Alpha builds on over 30 years of experience to develop solutions that resolve customers’ unique powering challenges.

As a member of The Alpha Group, it is part of a global alliance of independent companies that share a common philosophy – to create world class powering solutions for communication, commercial, industrial and renewable energy markets.
