ALPHA TECHNOLOGIES LAUNCHES NEW INDOOR WALL-MOUNTABLE DC POWER SYSTEM

Vancouver, BC. November 29, 2011 – Leading power solutions provider Alpha Technologies Ltd. is launching its latest compact indoor power system.

Conceived as a reliable backup power solution for various telecom equipment, the CXPS-48-500-IWM was designed for optimum power density. The system comes pre-configured with the class leading CXCI system controller and two Cordex 650W rectifier modules, supporting a maximum load capacity of 500W with N+1 redundancy. It features:

- Wall-mount capability provides flexible options for space constrained applications
- Light weight for easy installation
- Powder coated aluminum enclosure provides superior corrosion resistant properties
- Cordex-based DC power system offers modularity and scalability in power up to 500W
- Battery shelf can accommodate up to two 48Vdc strings of batteries for maximum run-times
- Low maintenance and high efficiency design reduces overall cost of ownership for the user

“The new CXPS-48-500-IWM is an extremely efficient, passively cooled indoor enclosure with minimum moving parts; all of which reduce Op-Ex costs to the customer,” remarked Satheesh Hariharan, Product Manager – Outdoor Systems at Alpha. “Its compact and wall-mountable format makes it the ideal choice for space constrained applications.”
