

Press Release

Alpha Technologies Joins the NGMN Alliance to Collaborate on 5G Network Powering Requirements

Vancouver, British Columbia. November 6, 2018 – Alpha Technologies Ltd., the power behind the evolution of communications networks, has joined the NGMN (Next Generation Mobile Network) Alliance (www.ngmn.org), the engine of broadband wireless innovation. To kick off its involvement, Alpha will be participating in the 7th NGMN Industry Conference & Exhibition taking place in Vancouver on November 7-8, displaying its innovative powering solutions that are enabling broad, routine deployment of 5G and small cell networks.

“We are very happy to welcome Alpha Technologies as a new Partner to the NGMN Alliance and look forward to integrating their highly specialised experience into our activities”, said NGMN Alliance CEO Peter Meissner.

“We recognize the importance of 5G networks and are excited to contribute to their growth and success,” said Ian Kane, President and Chief Operating Officer of Alpha. *“Our experience in powering thousands of small cells and other distributed wireless networks provides the type of unique deployment expertise that can truly complement the development of 5G standards and the resulting ecosystem.”*

At the NGMN Industry Conference & Exhibition, Alpha will feature its line of Remote Line Power solutions that enable service providers to energize remote radios, even when utility power is unavailable. Alpha will display products that can use either coax or copper networks to deliver power to the 5G devices, including both AC and DC powered units. Alpha's products will be on display at Booth #6 at the JW Marriott Parq in Vancouver, BC.

About NGMN Alliance

The NGMN Alliance (www.ngmn.org) was founded by leading international network operators in 2006. Its objective is to ensure that the functionality and performance of next generation mobile network infrastructure, service platforms and devices will meet the requirements of operators and, ultimately, will satisfy end user demand and expectations.

The NGMN Alliance will drive and guide the development of all future mobile broadband technology enhancements with a focus on 5G. The targets of these activities are supported by the strong and well-established partnership of worldwide leading operators, vendors, universities, and successful co-operations with other industry organisations.
