

ALPHA TECHNOLOGIES ACHIEVES ISO 14001:2004 CERTIFICATION

Vancouver, BC. January 10, 2014 – Alpha Technologies Ltd., leading supplier of power solutions for communications networks, traffic, security and industrial applications, is pleased to announce that during December 2013, its Burnaby facility successfully completed a certification audit of its environmental management system (EMS) to meet the requirements of ISO 14001:2004 (the international standard for environmental management systems). ISO 14001:2004 is a standard governing environmental management that helps guide organizations toward lowering their environmental impacts (by reducing all kinds of wastes), improving efficiency and driving down costs. It is reflected in all aspects of the operations and services at Alpha's Burnaby facility, including product design and development, manufacturing, purchasing, installation, support and servicing.

"This first and vital step underscores Alpha's serious commitment to the prevention of pollution from its Burnaby facility, with future initiatives focused toward further reduction of environmentally impacting elements within our supply chain and new product development", commented Andrea MacIntosh, Director of Quality and Continuous Improvement at Alpha. "By having ISO 14001 certification, Alpha now differentiates itself further from power suppliers that have not yet adopted the standard, and highlights our progressive approach to the environment and the needs of the evolving marketplace".

Alpha's ISO 14001:2004 certification adds to its growing list of quality standards, including ISO 9001 and TL 9000. For further details visit: www.alpha.ca/quality

For over 35 years, Alpha Technologies has been an industry pioneer and global leader in the design and manufacture of AC and DC power. Our distinctive excellence is the ability to innovate and quickly deliver optimized solutions for our customers' unique powering challenges in the Telecom, Cable Broadband, Traffic, Security, Industrial and Renewable Energy industries. Alpha's TL 9000 certified quality system, award-winning product strategy and continuous improvement/operational excellence program focuses on achieving complete customer satisfaction and supplying solutions of the highest quality, value and reliability.
