ARGUS TECHNOLOGIES NOW OFFERING LEADING EFFICIENCY POWER INVERTER SYSTEM

Vancouver, BC. October 28, 2009 – Leading Power Solutions provider Argus Technologies Ltd. is now offering a revolutionary new Alpha power product, unlike any other currently being deployed within the Telco Industry.

Named the Alpha Modular Power System 80HP (AMPS80), this high-performance, AC or hybrid AC/DC modular power supply was developed as an AC/DC backup power solution for critical central office, switching stations, cable headend and datacenter applications. It offers Telecom grade reliability, up to 94% power efficiency and high power density through a scalable, modular platform with intelligent system control.

“Our product development teams continue to pioneer cutting-edge technology that delivers reliable backup power for a variety of applications.” said Michael Burkhalter, Vice President of US Sales at Argus. “AMPS80 is currently the most unique and innovative solution of its kind in the industry”.

AMPS80 is offered in 3-phase, 2-phase and single-phase configurations to power up to 75kVA loads utilizing 2.5kVA inverter modules. Optional Cordex™ 1.8kW rectifier modules may also be added on the same rack to create a hybrid AC/DC power system.

A smart unified controller with integrated Ethernet/SNMP interface monitors and manages both the inverter and rectifier modules through a web based GUI and local LCD touch screen. The controller also features Email notification via TCP/IP, user definable alarms & data logging, flexible battery management features, and smart peripheral monitoring capabilities.

“AMPS80 offers a highly reliable and energy efficient power system, intelligently designed to reduce total cost of ownership and keep critical systems operating,” says Edna Menon, Senior Product Manager for the Alpha Modular Power System.

For more information, including drawings, specifications and further details on the impressive capabilities of the AMPS80, visit the product website at www.amps80.com.

Argus Technologies specializes in the design and manufacture of industry-leading DC power solutions for the telecommunications industry. In addition to complete custom power systems, Argus products include outdoor power enclosures, rectifiers, converters and system controllers featuring remote and local monitoring capabilities. Argus also offers EF&I, training, and 24/7 technical support through its dedicated service network.

As a member of The Alpha Group, Argus is part of a global alliance of independent companies that share a common philosophy - create world-class powering solutions for communication, commercial, industrial and renewable energy markets. Other members include Alpha Technologies, Alpha Industrial Power, Alpha Energy and G.B. Enterprises.
