Alpha Technologies Software Update Notification:
CXC HP Software Application v6.0

Date: September 25, 2019
Model #: CXC HP Software
Release: v6.0

Alpha Technologies is pleased to announce the release of our Cordex™ HP controller software version 6.0. A video outlining the new features can be found here.

New Features and Improvements:

- Support for distribution systems in Power Flow UI
- Added a **Test Alarm** button for each alarm
- Improved filtering and searching on the WEB UI
- Improved Add Load/Shunt Pairs wizard and Map Shunts to ADIO Inputs wizard to allow naming and manual mapping
- Support for French language
- Improved battery configuration based on battery model number
- Added multiple scrollable screens on the LCD dashboard
- Added an SNMP table to view active module alerts
- Support for FXM-HP
- Added a system shortcut page to LCD UI. Accessed with button press on the LCD dashboard
- Support for the current transducer IPM (interface and power module)
- Added ability to reset the IP address from the OLED display on in-shelf controllers
- Added ability to set up a **Datalog** to capture a sample on a change in value
- Added a new user role for Restricted Operator. Restricted Operator does not have permission to add or remove items from systems
- Added ability to select the display precision for current readings on loads, shunts and current transducers
- Added more rectifier information to the rectifier details screen
- Added option to include T2S configuration and event log to diagnostic export

All software updates and the latest user manual can be found on our website at alpha.ca.
