Alpha Technologies Customer Notification: END OF LIFE NOTICE

Dear Valued Customer:

Our Cordex 3.6kW and 1.8kW rectifiers have been providing our customers with reliable performance for many years (8 and 6, respectively). However, with growing customer demand for reducing energy costs and addressing environmental concerns, in 2010 we proudly introduced a family of Cordex™ High Performance (HP) rectifiers, the CXRF-HP-48V-2kW and the CXRF-HP-48V-4kW.

These new rectifiers embody our ongoing commitment to provide power solutions offering high efficiency, best in class reliability and power density. To ensure our customers a seamless transition path, both these new models are completely backwards compatible with your existing Alpha power systems which utilize the CXRF 48V-1.8kW and CXRF 48V-3.6kW.

Offering **10% more power, 33% less inefficiency and 11% greater power density**, these new models effectively negate the need for the earlier products; therefore **effective December 31, 2012 we will no longer be selling the 1.8kW and 3.6kW rectifiers**. Technical support for the 1.8kW and 3.6kW products will continue to be available from Alpha indefinitely.

PRODUCTS TO BE DISCONTINUED		REPLACEMENT PRODUCTS	
CXRF 48V-1.8kW	010-580-20-035	CXRF-HP-48V-2kW	010-622-20-040
