Alpha Technologies Product End of Life Notice: AMPS24, AMPS80 HP & External Maintenance Bypass Switch

Date: December 16, 2016

Model #: AMPS24, AMPS80 HP & 125/255A Bypass Switch

Part #: 0260011-XXX, 0260012-XXX, 026-068-XX, 026-069-XX, 0200018 & 0200026

Dear Valued Customer,

Alpha Technologies is rolling out a new line of modular inverter products for the critical facilities market, the **AMPS HP2** family, which will replace our existing AMPS HP lineup. The versatile AMPS HP2 can be configured for use as an Inverter or a UPS in either single, split, or three-phase arrangements. 19-inch and 23-inch rack-mount versions are available in 10-30kVA inverter configurations. 7-foot box bay 40kVA & 75kVA options are available either as an Inverter or as a UPS. All AMPS HP2 products now use the same core 2.5kVA modular inverter modules and communicate seamlessly with Alpha's CXC HP Controller. New External Maintenance Bypass Switches will be offered as well with higher short-circuit current ratings.

Some of the key features of the AMPS HP2 are:

- Improved configuration, monitoring & functionality with CXC HP controller integration
- Improved craft connectivity for DC, AC and I/O monitoring
- MBS & TVSS are standard on all configurations
- Simplified operation by obsoleting the option of a DC breaker feeding each inverter module

As a valued customer, Alpha is offering you a last-time opportunity to purchase the AMPS80 (until existing quantities last). Alpha has material inventory to build approximately (30) AMPS 24 and (15) AMPS80 HP's. We will be happy to work with you to determine the quantities you may wish to order in this last-time buy, based on a non-cancellable non-returnable purchase order. We apologize for the short notice and will attempt to accommodate all requirements. Please see attached spreadsheet for cross reference to new models available.
