# END OF LIFE NOTICE
## CXCM1+ Shelf Systems

Date: March 24th, 2020
Model #: CXCM1+ Shelf Systems
Part #: 0180030-004, 0180030-005

Dear Valued Customer,

Alpha's CXCM1+ controller and shelf-based power systems have been providing reliable performance for the last several years. Due to consolidation of product lines and the end of development on the CXC controller software we will no longer be manufacturing new units of the CXCM1+ shelf systems.

Alpha's CXCM1 HP controllers are commercially available, backwards-compatible replacement options with numerous advantages over the legacy controllers.  CXC HP series controllers enable AlphaIQ technology allowing control and monitoring over multiple Alpha power solutions from a central location.  Other advantages include:

- USB support for local management of upgrades, configurations, and backup/restore
- Configurable and common web user interface for all Alpha systems
- On-board I/O and compatible with Cordex ADIO peripherals
- Advanced features such as programmable logic, complex data logging, Power Save system efficiency optimization, SNMPv3 and other advanced security options.

More information is available on Alpha's website: http://www.alpha.ca/solutions/solutions-alpha-catalog/controllers-communications/controllers

The CXCM1 HP controllers are backwards compatible in all legacy shelves and power systems which used the CXCM1(+).

As a valued customer, Alpha is offering you a last-time buy opportunity to purchase CXCM1+ controllers and shelf systems until August 1st, 2020, with a last time ship date of November 1st, 2020.
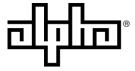

Although production of these systems is being ramped down, Alpha has a detailed inventory plane to support the power systems with replacements and repairs beyond the End of Life date.

The replacement of these systems is highlighted below with their modern CXCM1 HP variants.

| PRODUCTS TO BE DISCONTINUED | | REPLACEMENT PRODUCTS |
| --- | --- | --- |
| CXCM1+ Controller | 0180030-004, 0180030-005 | 0180054-001 |

| 1.2kW Bulk | 030-835-20-041 | 030-835-20-441 |
| 1.2kW 1RU GMT | 030-851-20-040, 030-851-20-244 | 030-851-20-440, 030-851-20-444 |
| 1.2kW 2RU | 0300165-005, 0300165-006 | 0300165-405, 0300165-406 |
| 1.2kW Custom | 030-834-20-143, 030-834-20-240, 030-834-20-243 | 0300165-405, 0300165-406 |

For kits containing the above top-level part numbers please refer to the [supplemental excel spreadsheet](#).

No response to this notification is required.  Should you have any questions or comments regarding discontinuation(s), please address these to your Alpha sales representative or contact us directly at 1-800-667-8743.

We will be happy to work with you to determine the quantities you may wish to order in this last-time buy. It is highly recommended that orders be placed as far as possible in advance of the deadline. We apologize for the short notice and will attempt to accommodate all requirements. Note that all orders require non-cancellable, non-returnable purchase orders

Sincerely,

JD Fraser                                           Doddy Wijanta
