

## Custom AOES6 (S6 / SE48-1616) Enclosure Systems

Date: October 29, 2019

Model #: S6 Enclosure; AOES6 Enclosure; SE48-1616 Enclosure

Part #: 026-053-XX; 0260024-XX

Dear Valued Customer,

Alpha’s Outdoor Enclosure System (AOES6), also known as the S6 and the SE48-1616 is an enclosure able to be produced in custom configurations based on specific customer requirements. The building blocks in various configurations produce a separate SKU prefixed by an 026 system number. This allows customers to reorder custom configurations, traceability, tech support, and engineering support for these SKUs.

We have completed a review of our custom configurations in this product line and have determined that the following list will be made end of life due to two years of inactivity.

Although these systems are being made obsolete, many of the building blocks within them are still active, which may allow revival of the product under a special order agreement. Please contact your Alpha representative if you wish to purchase a specific system.
